Roberts Europe receives first Dutch Lean and Green Award for sustainable logistics

Maastricht-Airport (NL) – Under the innovation programme of the Dutch Ministry of Transport and Public Works, Roberts Europe yesterday won the first Lean and Green Award. Koen Sevriens, Quality and Safety Manager at Roberts Europe, accepted the “Lean and Green Award” from Mr Hugo Bouwer (Energy Transition Director of the Ministry of Economic Affairs).

Roberts Europe is one of the Dutch logistics companies to officially may use the logo of the “Lean and Green Award”. This award is granted to companies who make efforts toward efficient and sustainable freight transport.

By building a European network and optimising the cargo space of the vehicles, the efficiency of the operational and transport processes will increase by 4% a year and as a result of this the CO₂ emission will be reduced by 4% a year. New computer and communication systems enable Roberts Europe to monitor its Premium Freight transports in all of Europe.
